PROFESSIONAL SUMMARY

Product-oriented Full Stack Engineer with ~2 years of full-time experience building and delivering production web, mobile, and backend applications. Experienced in translating product requirements into scalable technical solutions, owning features end-to-end, leading junior developers, and managing cloud deployments and production releases. Strong in NestJS, Next.js, Flutter, MySQL, and Google Cloud.

EDUCATION

Bachelor of Engineering (BE) in Computer Science,
Global Institute of Engineering and Technology, Anna University (2020 - 2024)

TECHNICAL SKILLS

Frontend - HTML, CSS, JavaScript,React.js, Next.js, Tailwind CSS, Mobile - Flutter

Backend - Node.js, NestJS, Express.js, REST APIs

Database - MySQL, MongoDB

Cloud - GCP, Cloud Run, App Engine

DevOps - GitHub Actions, CI/CD, deployments, instance management

LEADERSHIP & STRENGTHS

- Product Ownership
- Technical Decision Making
- Team Leadership
- Problem Solving
- Cross-functional Collaboration

ENGINEERING FOCUS

- System Design & Architecture
- API Design & Integration
- Database Design & Optimization
- Cloud Deployment & CI/CD
- Production Debugging & Optimization

EXPERIENCE

Full Stack Developer — Corporate Sports Club

- Owned end-to-end product development across web, mobile and backend systems, translating product requirements into scalable technical solutions.
- Designed and developed core sports management workflows supporting ~28 sports and 6+ competition formats, including league, knockout, league+knockout, round robin, time trial, heats and attempt-based events.
- Led 3 junior developers through sprint planning, technical guidance, code reviews and delivery.
- Designed product UI/UX and managed GCP deployments, CI/CD workflows, production infrastructure and application releases.
- Stack: Next.js, NestJS, Flutter, MySQL, Google Cloud

Fitness & Health Data Platform

- Developed cross-platform health-data integrations with Apple Health/HealthKit, Android Health Connect and Google Fit.
- Implemented automated hourly data synchronization and controlled source handling for step data, supporting walkathon leaderboards and 3 challenge modes.
- Refactored and streamlined existing implementation to improve code quality, maintainability and consistency across the platform.
- Stack: Flutter, NestJS, MySQL, HealthKit, Health Connect, Google Fit
